

Health and safety at the site questionnaire

If an Inspector will visit the site(s), they will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site and any land or building that the Inspector will need to enter. Please supply any additional information on a separate sheet of paper

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required, and will this be supplied at the site?

Both the Release and Replacement Land are flat, but a good pair of walking shoes or wellington boots are advised, depending on the weather.

The Release Land lies within an active aerodrome, Hi-Viz vest is mandatory (and can be provided). Access is only under escort from persons approved to be within the airside environment.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

The Replacement Land is currently grazed by horses. It is advised the Inspector should be accompanied by those familiar with handling horses.

3. Is the site remote and/or can it be seen from other occupied buildings/property/public land/roadside?

The majority of the Release Land can be seen from the public access areas of the aerodrome car park.

The majority of the Replacement Land can be seen from the Cottage Farm Livery Yard.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

Yes, good signal at both.

5. Are there any areas that require specialist equipment or training for access – any confined spaces?

The Release Land lies within an active aerodrome, Hi-Viz vest is mandatory (and can be provided). Access is only under escort from persons approved to be within the airside environment.

6. Are there any dangerous pieces of equipment or substances stored at the location?

The Release Land is a working aerodrome, aircraft and refuelling activities take place across the site.

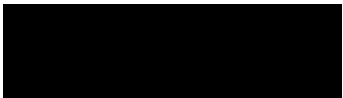

7. Is there any likelihood of exposure to chemicals, asbestos, radiation or are there any other risks, requiring the use of Personal Protection Equipment, which may affect the health & safety of the Inspector? (Asbestos is referred to directly as it was present in buildings built before it was banned in 1977).

No

8. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

None
